November 1995 Meeting Notices

2 - count'em - 2 November meetings

1

Chris Tapping, sound engineer for the 5th Avenue Theater, will be our host for a tour of the theater. Built in 1926, languishing as a movie house until a grand restoration in 1979, the 2100 seat theater is now a showcase for performing arts. The sound system is the 3rd design to be installed since the remodelling. Of special interest to soundies will be the large Meyer installation, Yamaha PM4000 board, complete use of the matrices, delays and wireless hearing-impaired system. Design was by Promix of NYC and 5th Avenue engineers Chris Tapping and Mark Anderson.

**5th Avenue Theater

Kelley Mascher of the Audiology Research Department at Children's Hospital and Medical Center will present an overview on the topic of Human Hearing.

**Human Hearing
Tuesday, November 7
7:30 PM**

**126 Communications Bldg
University of Washington**

As an audio engineer, you probably have normal or near-normal hearing acuity. Have you ever wondered what a person with hearing impairment experiences? Can we take knowledge of this and improve the delivery of audio media to these people via an ADA hearing-impaired system?

Kelley will describe some of the more common types of hearing loss, their causes, and what we can do to assist those with hearing losses as Audio Engineers. He will also discuss what (if anything) we can do to protect one of our own most precious assets.
