September 1993 Meeting Notice

“Examining a PC-Based Digital Audio Workstation”

Jeffrey Bruton and Ted Wolfe
Spectral Synthesis

DATE: Wednesday, September 1, 1993 - 7:30 PM

PLACE: Triad Studios, 4572 150th Ave. NE, Redmond, WA
98052 (881-9322)

DIRECTIONS: From I-5 north/south or I-405 north/south, get on SR520 eastbound toward Redmond. Take the 51st St. exit. At the stop sign, turn left (back over SR520) to 150th Ave. NE and turn left here. Southbound on 150th the road is a big “S” curve, with Nintendo buildings on the left and a basketball court on the right. Look for the “Overlake North” business park sign, and turn in here. Go to the right rear, Building F.

Interest in the various implementations of Digital Audio Workstations continues, and this meeting will allow a detailed examination of a PC-based system, the Spectral Synthesis Audio Engine. The system will be on hand to audition in the fine Triad Studio A. Jeffrey Bruton, product specialist, will demonstrate the capabilities of the system and technical details, such as their FlyBy digital audio bus, will be explained by Ted Wolfe, Vice President of Engineering at Spectral Synthesis. Spectral Synthesis is a Woodinville, Washington manufacturer of digital audio products.

NON-MEMBERS ARE WELCOME TO ATTEND

1992-93 Officers and Committee Members

Chairman
Al Swanson
Location Recording
527-0318

Vice-Chairman
Van Browne
Northshore Marketing
284-9699

Acting Secretary
Gary Louie
UW School of Music
