Interesting read as they said it was a low noise device...😂
18:55:13 From Dan Mortensen, Chair, he/him : Thanks, Steve. Everyone: If you want to save the Chat including any links that people post, you can go to the three dots in or below the space where Chat comments are typed, click on those three dots, and "Save Chat" will appear. On Macs, Saved Chat goes to a folder in Documents labeled "Zoom" and saved chats will be in a folder with today's date. Not sure about PCs. You may need to save Chat periodically as it MIGHT not save anything that comes after you've last done the Save.
