# AM1 & AM2 Gain-Sharing Automixer (also RADs)

# RAD27 USB Audio Sound Card

- USB Audio I/O
- 16-bit, 48 kHz
- Simultaneously Playback & Record from one PC
- Any vintage Mac or PC
  - No driver to install
- Auto-senses OS authorization:
  - Projector on, screen/lights down, switch vid

# RAD27 USB Audio Sound Card

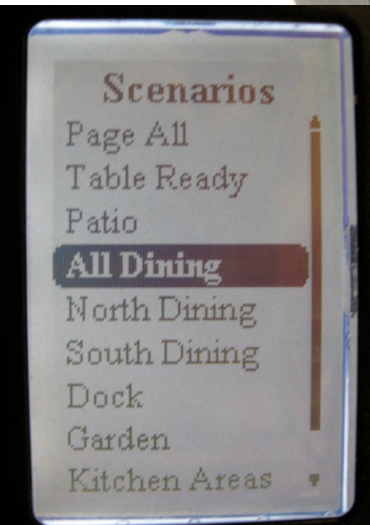

- **Presentation Podiums**
- **Meeting Rooms, Education**
- **City Council, PTA meetings, School Dances, Nightclubs, Concerts, Sports events...**
- **PCs with prerecorded announcements, messages, K-Mart blue light specials...**

# PAGER1 Desktop Paging Station

- Mic stage RAD
  - SW adjust
- *Scenario* (group of zones) LCD list
- Select knob, push-to-talk
- Status indicators
- 32 supported

# RAD17

- **Boundary Layer Mic RAD**
  - aka PZM Pressure Zone Mic
- **Weather resistant ...mylar**
  - Omni electret element
- **Ambient noise sensing, surveillance, interrogation, detention center, security, industrial, train stations...**
- **Use with *Ambient Noise Compensation* DSP block**
- **Spray paint any color to please Interior decorators**

# “EXP” Expansion Bus

Expansion Bus uses RJ-45 plugs on shielded CAT 5e (or better).

Locate the Expanders up to 100 meters (300 feet) away from each other.

For greater distance, use off-the-shelf Gigabit media converters:

- Multimode Fiber: up to 2 km (1.2 miles)
- Singlemode Fiber: up to 12 km (7.5 miles)

Shielded CAT 5e (or better) for distances < 300 feet (100 meters)

- EXP1x, EXP2x, EXP3x, EXP5x & EXP7x
- Conference Centers
- Classrooms
- Campus
- Hotels
- Malls
- Arenas, Sports & Water Parks
- Multiple Equipment Rooms

# Ethernet, RAD and DR Cable Lengths

**\*Gbit Ethernet media converters are supported.**

# Ethernet, RAD and DR Cable Lengths

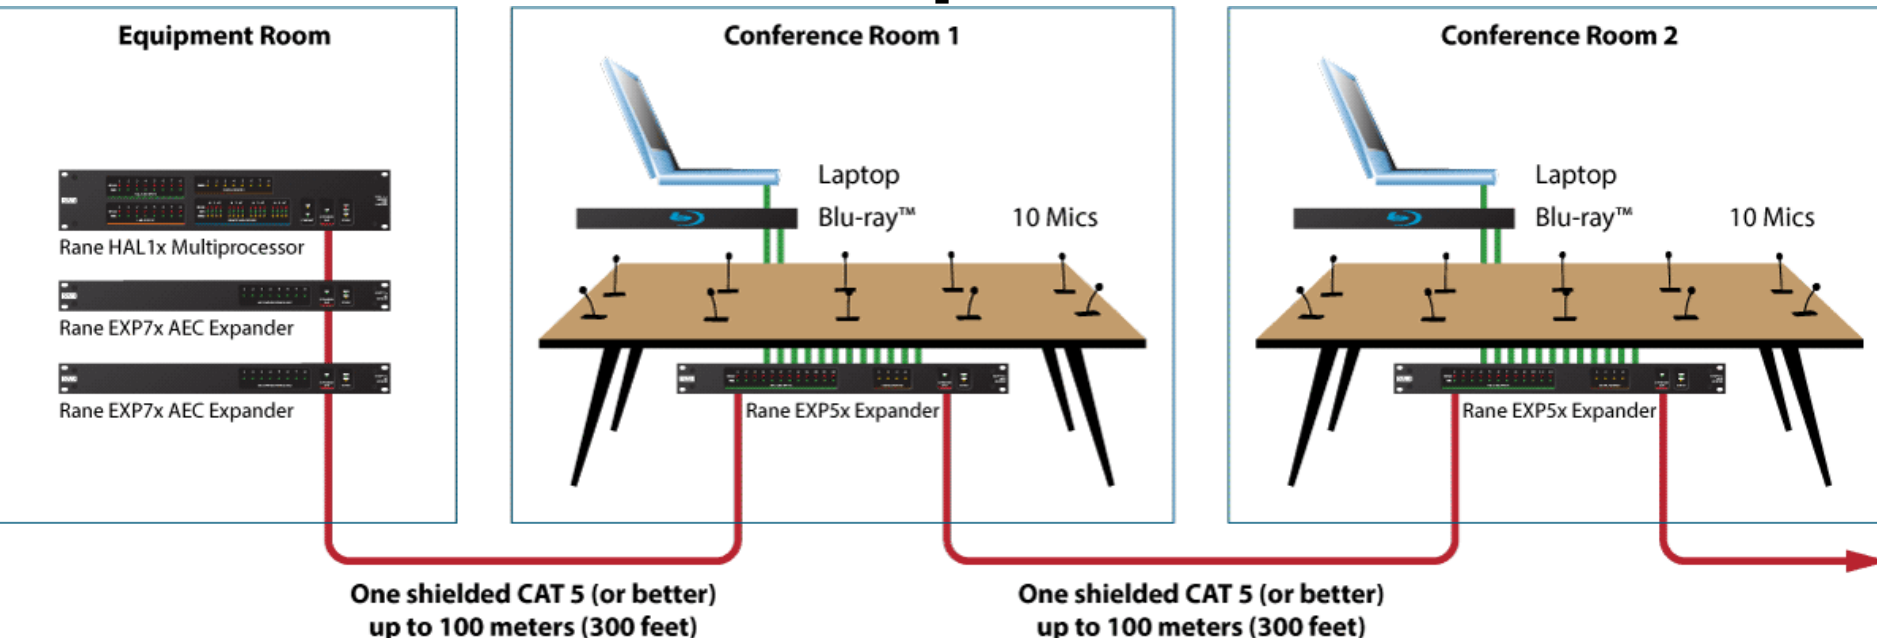

## Useful HAL1x Expansion Bus Idea

# EXPs - Expanding HAL1x in racks and rooms

# **EXPs - Expanding HAL1x**

## **in racks and rooms**

**512x512 audio Expansion Bus for HAL1x**

- **Auto firmware & settings sent from HAL1x**
- **Hot swap, hot crimp, auto SW wiring**
- **Daisychain any combo up to 32 EXPs**
  - **Shielded CAT 5e or better or unmanaged fiber optic gigabit media converters**
- **Ethernet layer 1 (*not* layer 2)**
  - **100 m (325 feet) between devices**
- **Link indication in SW & HW: both cable ends**

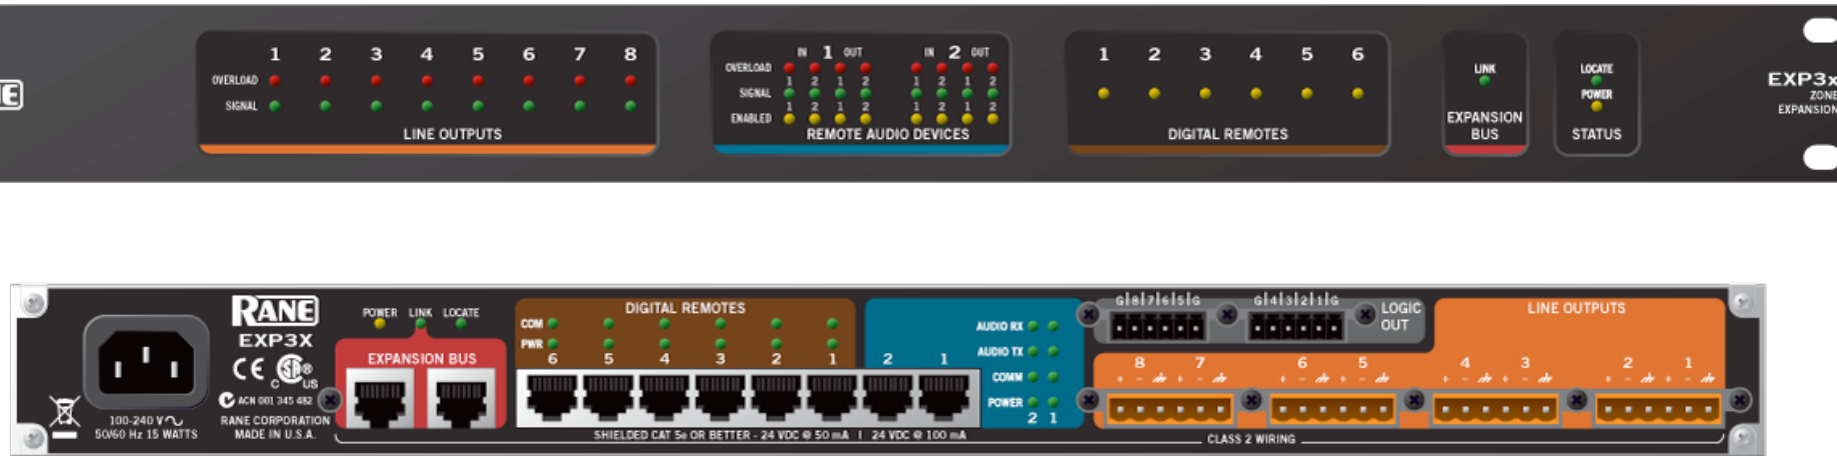

# EXP1x - Expand more RAD/DRs

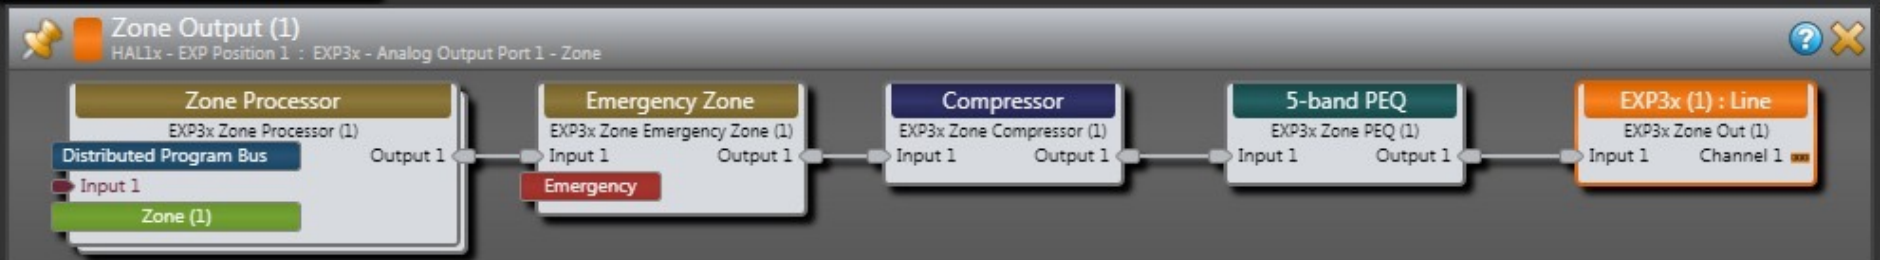

# EXP3x Output & DSP Expander

- *4 inputs 12 outputs*
- 8 Logic Outputs - for 70 V relay paging apps
- Daisychain 32 = 256 out; +64 RADs = 384 outputs

**Fixed Output DSP included:**

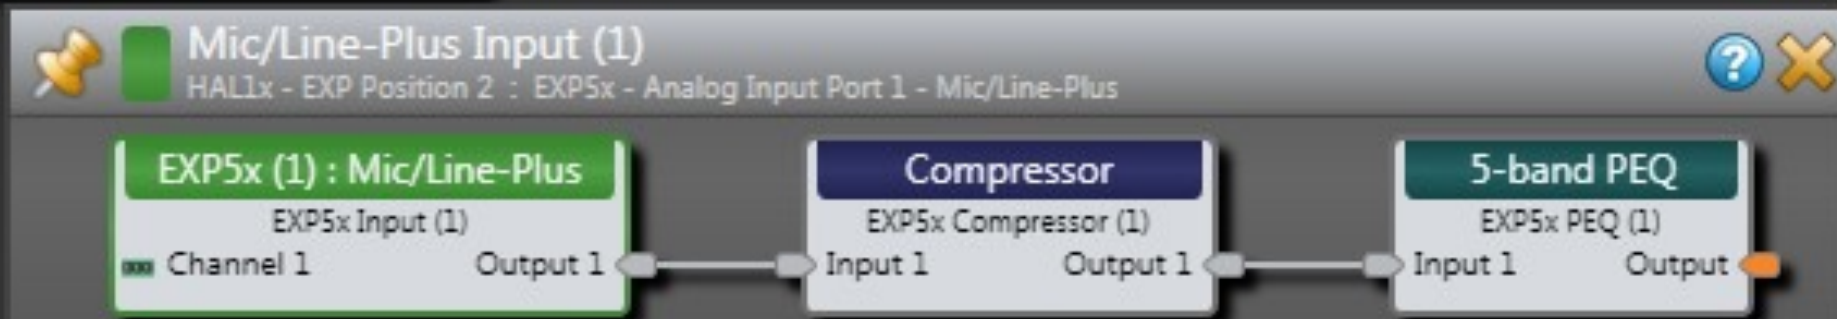

# EXP5x Input & DSP Expander

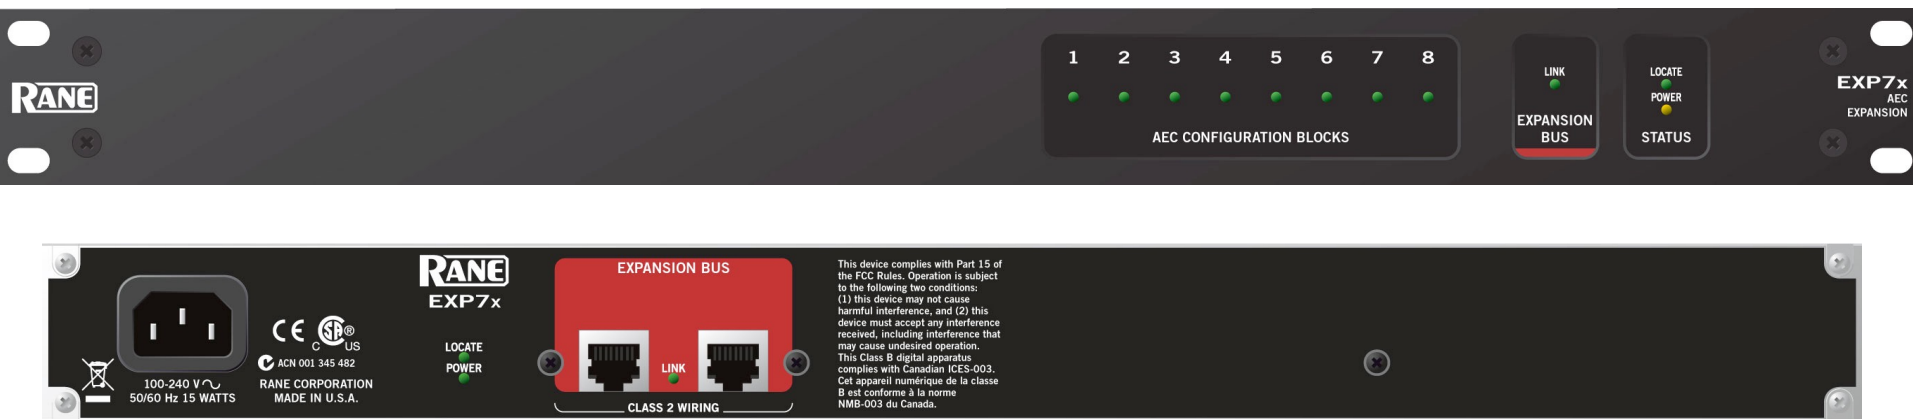

- 12 Mic/Line/Line-Plus - handles any audio input
  - Line-Plus: Monos unbalanced RCA L&R inputs

**Fixed Input DSP included:**

# EXP7x: Acoustic Echo Cancelling

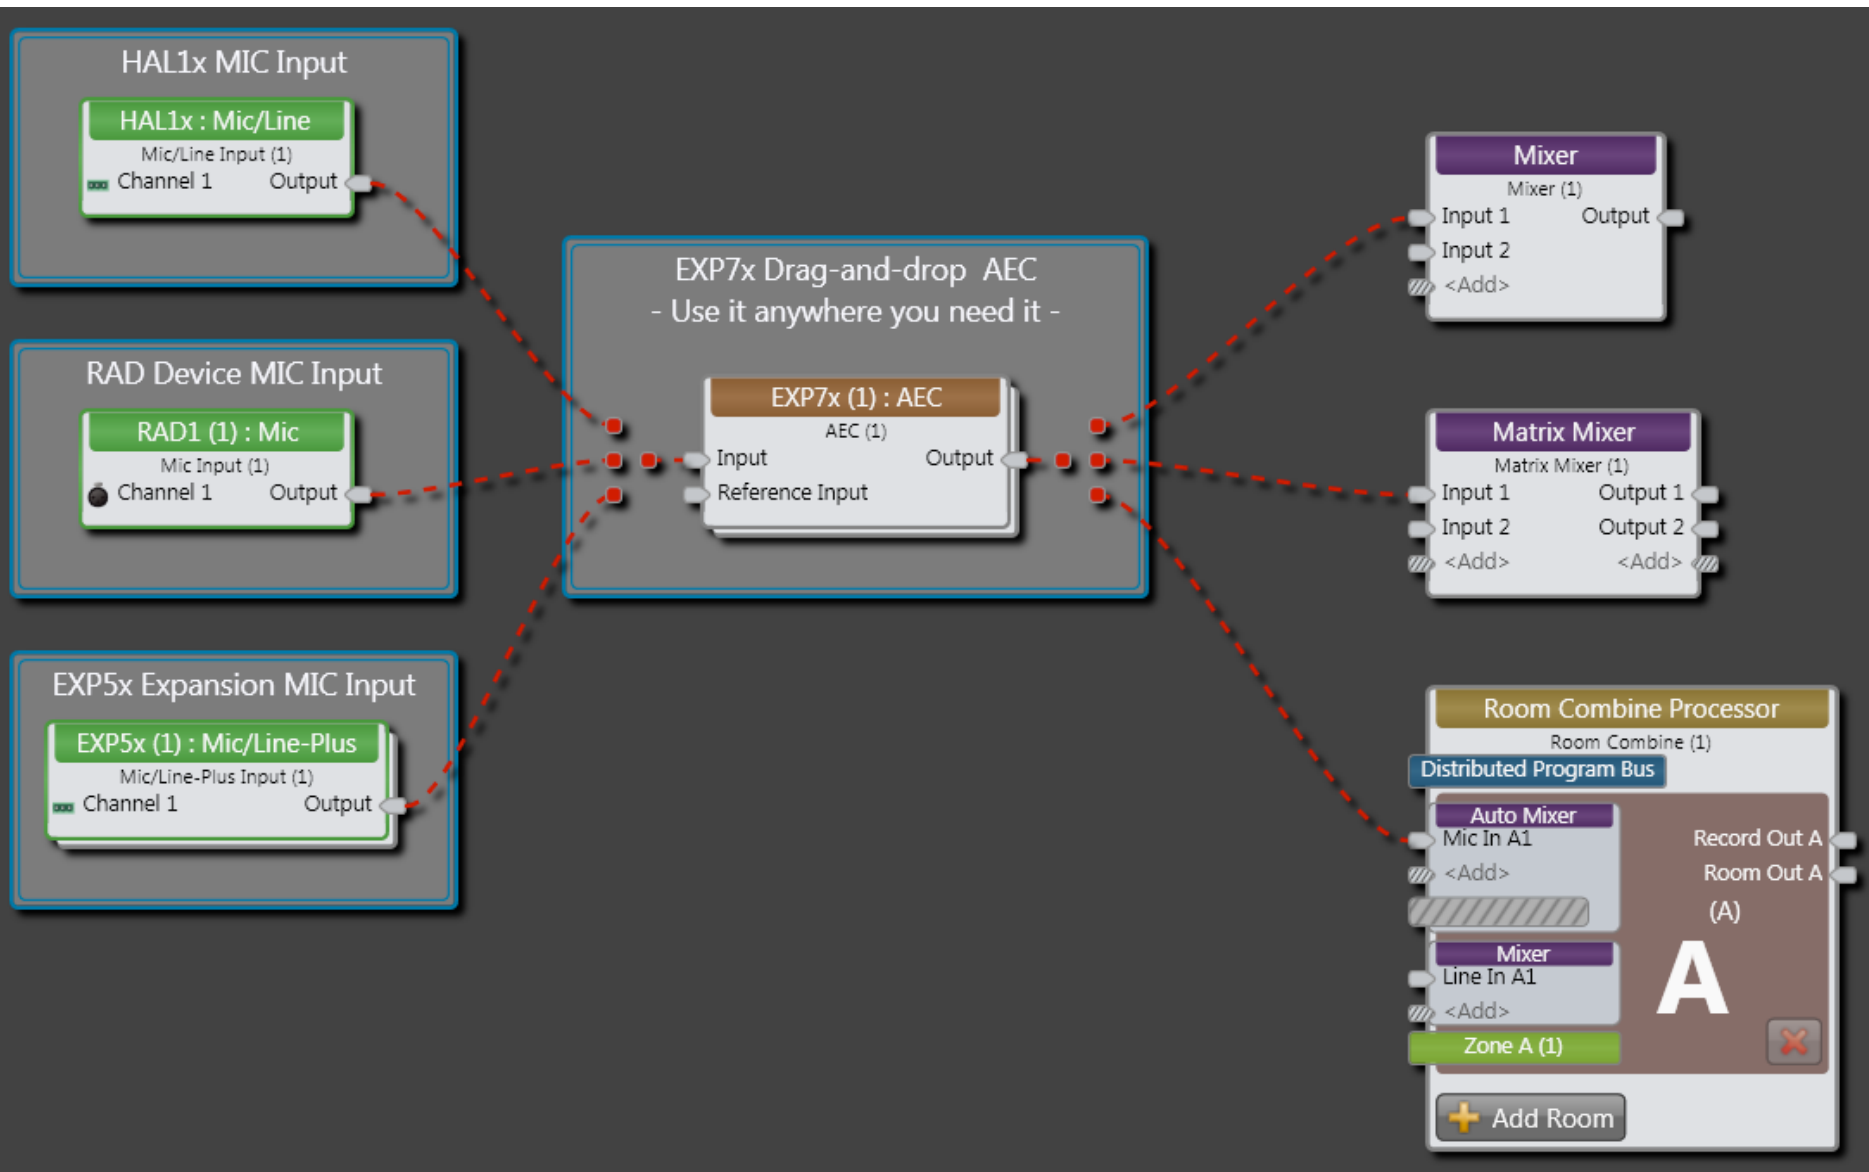

- 8 channels of drag and drop AEC
  - Use the AEC block with any HAL1x input anywhere in the system
    - e.g., Analog, RAD, EXP, AES3, USB Audio, **Dante**

# Drag and Drop AEC

# Drag and Drop AEC

# New EXP2x Dante Expander

# New EXP2x Dante Expander

- Network facilities or multiple independent HAL1x Systems together

# New EXP2x Dante Expander

- Network facilities or multiple independent HAL1x Systems together
- 32 x 32 Dante channels @ 48 kHz or 96 kHz

# New EXP2x Dante Expander

- Network facilities or multiple independent HAL1x Systems together
- 32 x 32 Dante channels @ 48 kHz or 96 kHz
- Daisychain up to 16 EXP2x to a single HAL1x: 512 x 512 channels, maximum

# New EXP2x Dante Expander

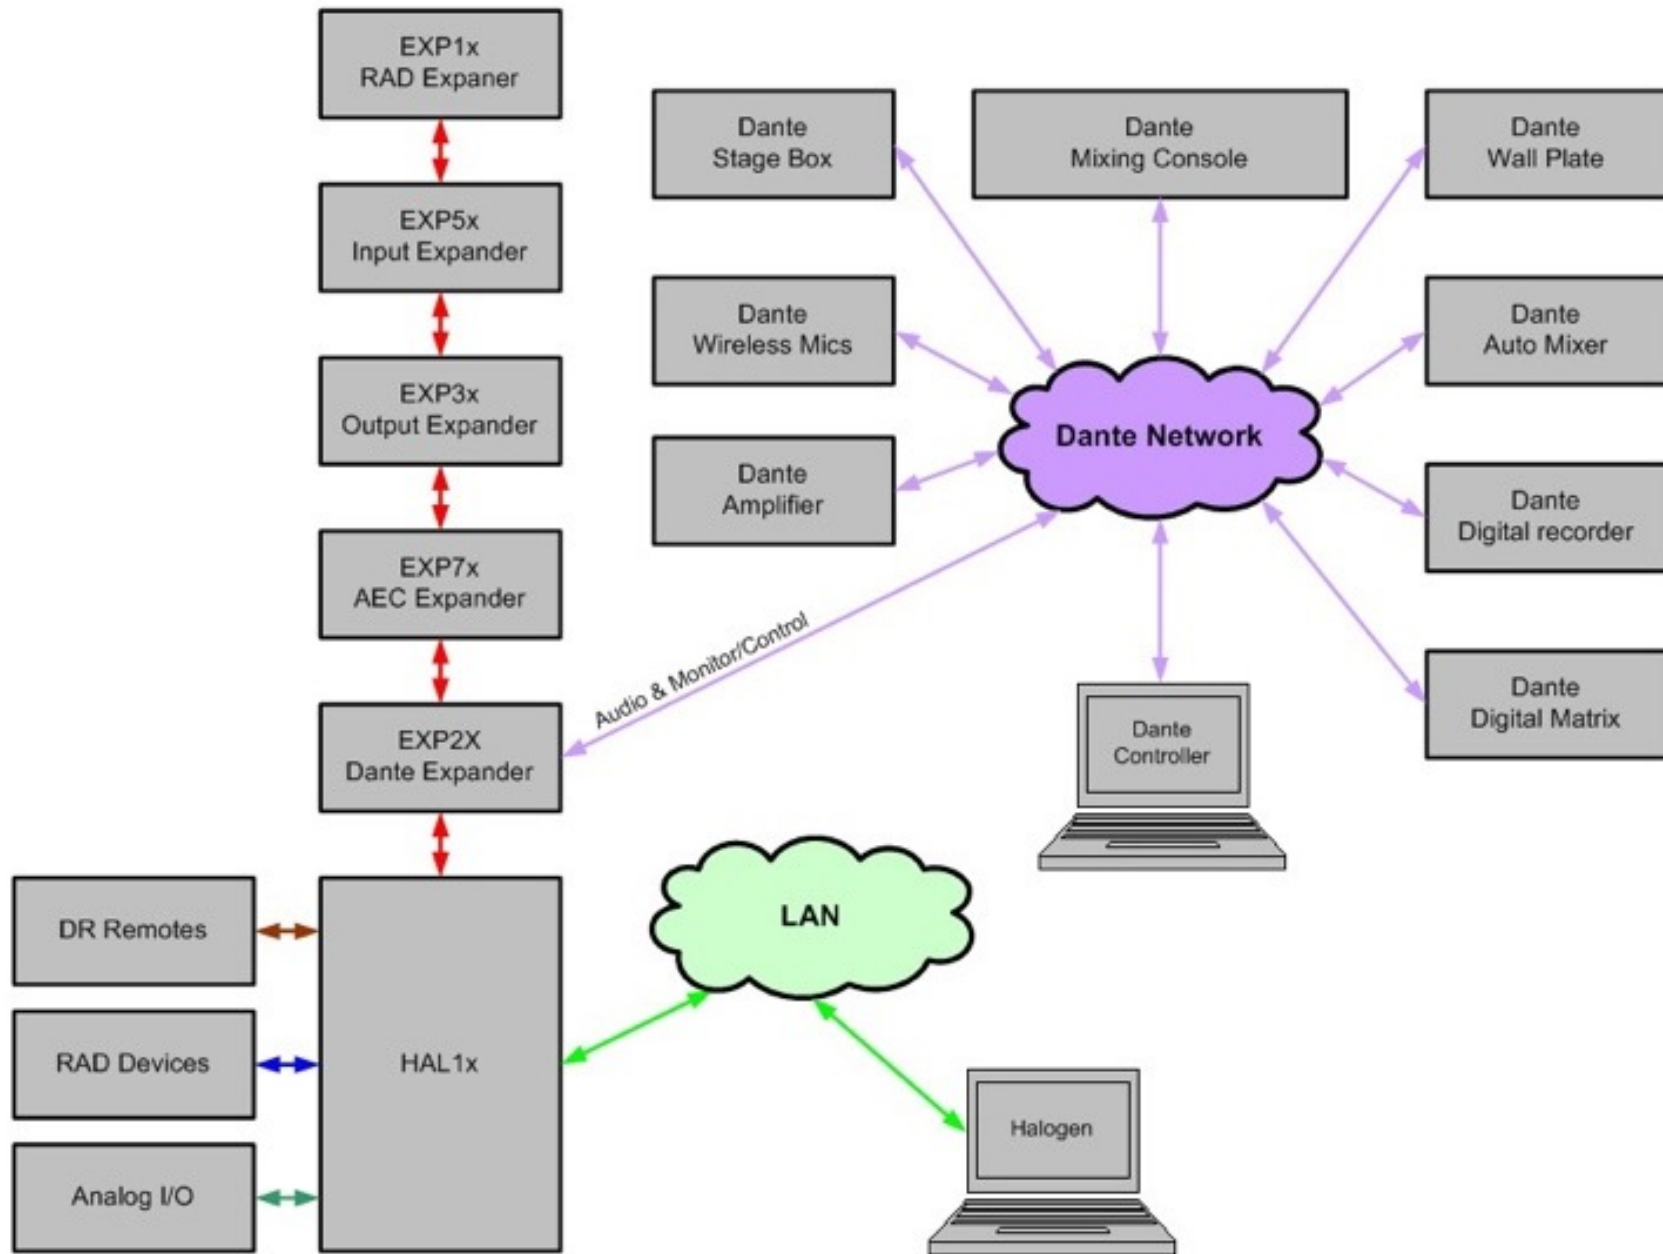

- Network facilities or multiple independent HAL1x Systems together
- 32 x 32 Dante channels @ 48 kHz or 96 kHz
- Daisychain up to 16 EXP2x to a single HAL1x: 512 x 512 channels, maximum
- Secondary Dante port supports Redundant or Switch modes

# EXP2x Performance Theatre

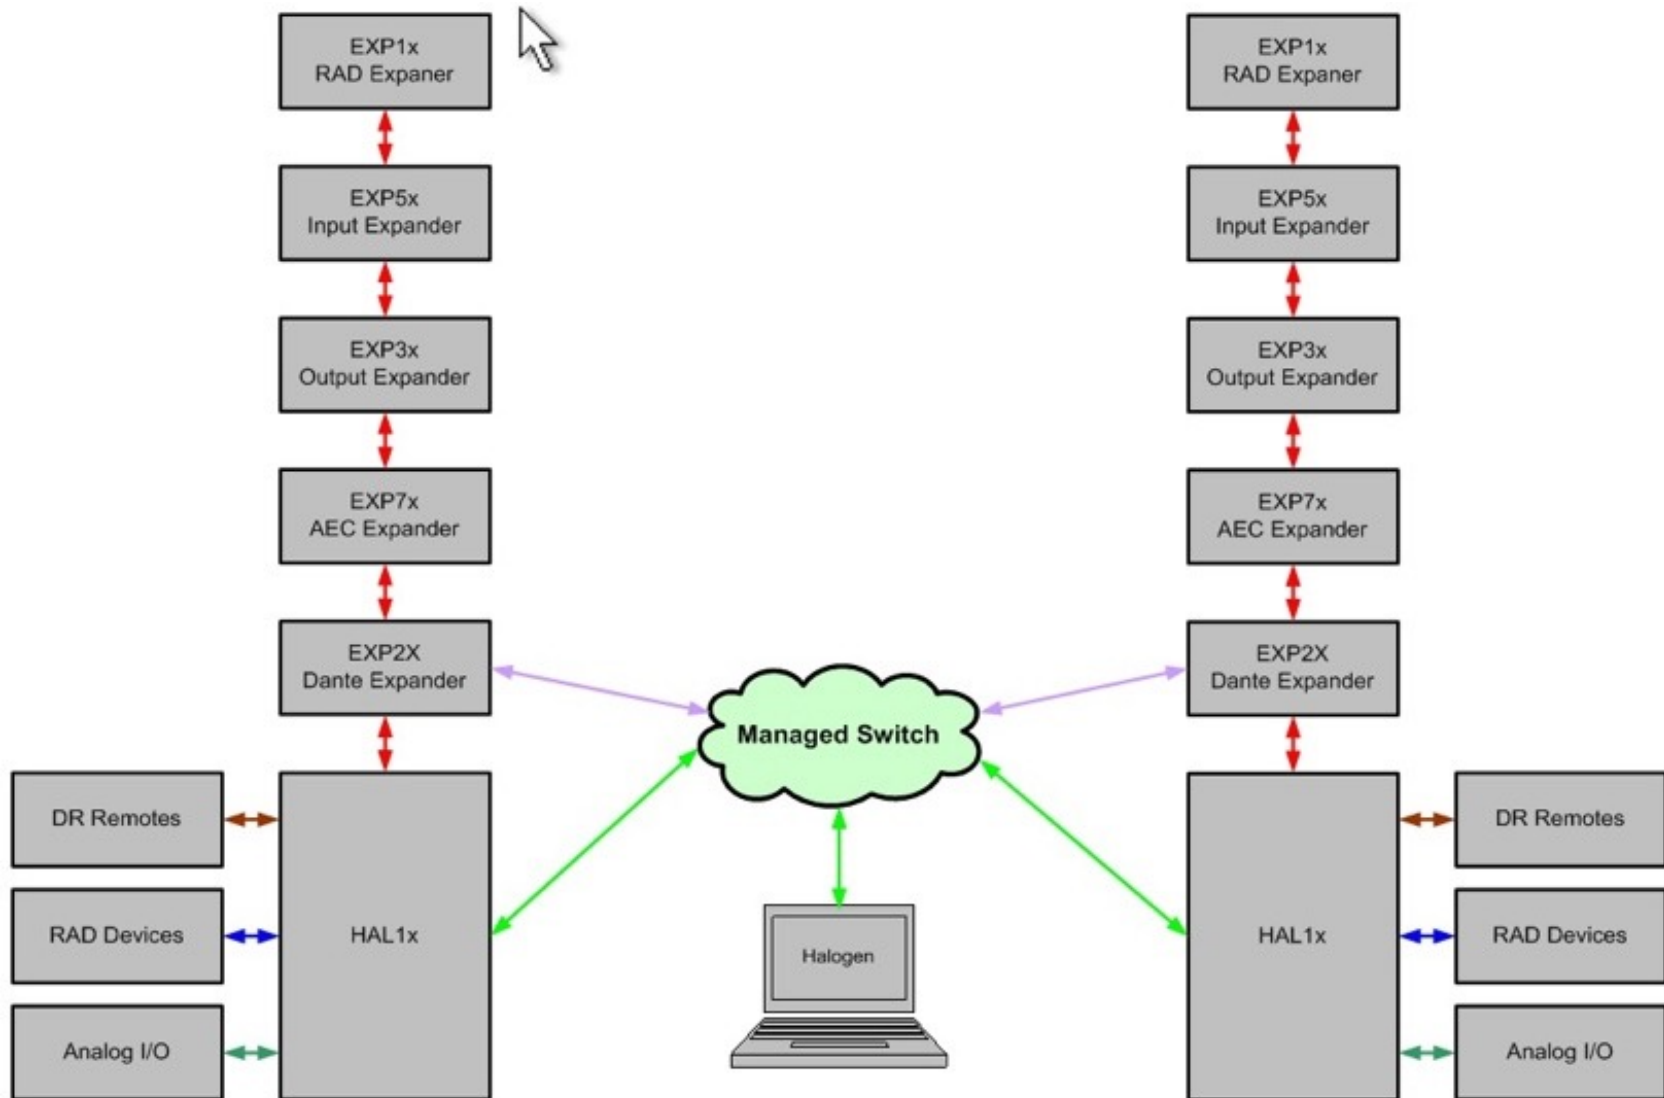

# New EXP2x Dante Expander

# New EXP2x Dante Expander

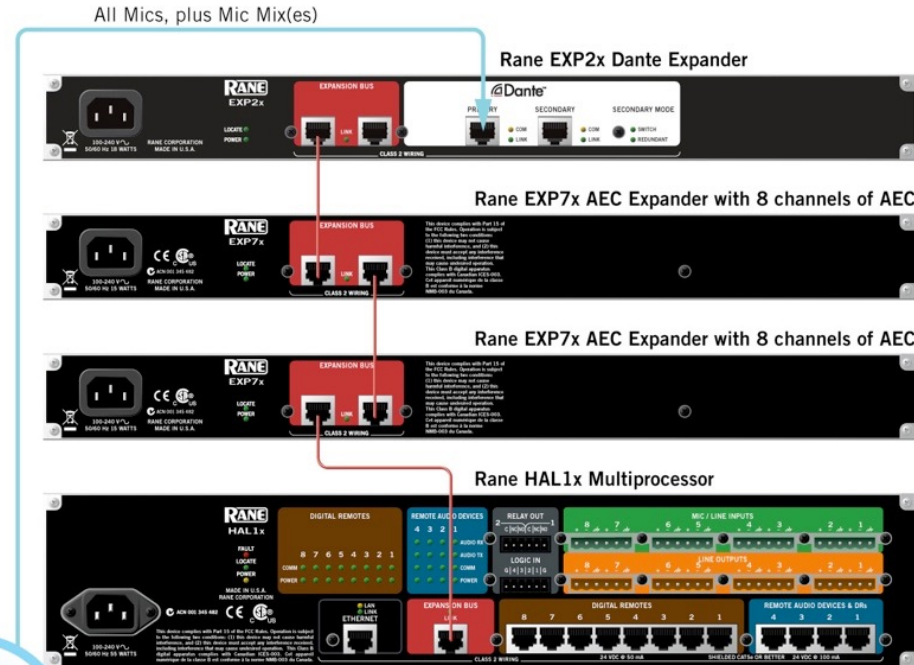

# Add AEC to Shure's SCM820 Dante mixer(s)

Add more Shure Dante Mixers for up to 512 mic channels.

Add more Rane EXP7x Expanders for up to 512 AEC channels.

All Mics, plus Mic Mix(es)

# Designer/ Consultant Benefits

- **Get on the  
Plane  
Indicator**

Green means "Get on the Plane"

Yellow means "Don't Get On the Plane, Yet."

## Know HAL #1: HAL's "Get on the Plane" Indicator

Does your formerly favorite audio DSP tell you all 7 of the following things with a single, live device software indicator?

All hardware devices in your original Halogen design file are:

- (1) physically present in the building and connected,
- (2) in the proper location in the building,
- (3) all cables were pulled through the building without mistakes or mislabeled cables,
- (4) all cable crimps on all RJ-45 cables are correct,
- (5) control communications and all audio I/O are already working,
- (6) the settings for all DR and RADs are intact and working,
- (7) the proper version of firmware is already loaded and working in every attached HAL System device.

# Thank you

**Since 1981, engineered, designed, built, tested & supported in Mukilteo, Washington, USA**

**[www.rane.com/hal/new.html](http://www.rane.com/hal/new.html)**

**425 355-6000**

**Pacific time zone: Monday - Friday 8 am to 5 pm**

**Still privately owned by the gal who started Rane in her garage**

# Thank You!
